ECO2 LEVEL

PO Box 170065
Boston, MA 02116
United States of America

To whom it may concern,

Vertima, as a third party, hereby confirms that a full analysis process in the context of Health Product Declaration®¹ preparation has been completed for ECO2 LEVEL. Products concerned by the analysis are: ECO2 LEVEL, ECO2 LEVEL LP and ECO2 LEVEL Primer.

For each of the aforementioned products, all ingredients present above the disclosure threshold of 1,000 ppm, and their respective CAS numbers, have been analyzed. All the necessary data has been collected through ECO2 LEVEL's supply chain but remains confidential for proprietary reasons. Following our analysis, it is possible to say that none of the ingredients listed in the *Red List v3.1*² are present in the three abovementioned products by ECO2 LEVEL at 1,000 ppm or above.

Under no circumstances does this letter replace the Declare³ label by the International Living Future Institute™.

It is important to note that the validity of this confirmation is conditional to the annual verification of the chemical composition of the three products ECO2 LEVEL listed above, as well as of all the suppliers belonging to their respective supply chains.

If you require further information, please do not hesitate to contact us.

Kind regards,

A handwritten signature in black ink, appearing to read "Aline Cobut", written over a horizontal line.
